

# TRANSPORT CASE SITE LIGHT 40

Designed for safe transport and storage of your work light

This transport case enables you to safely transport your SITE LIGHT 40 work light to the building site.

It is a sturdy and high-quality case that can withstand shocks and rough handling during transport. It is designed with a built-in handle and is extremely lightweight for easy and effortless transport, so you can transport it effortlessly. Inside, the transport case is supplied with black foam that protects the lamp.

When SITE LIGHT 40 is not in use, the transport case can be used to store the lamp. It is also very suitable for rental companies, as the products can easily stand on a shelf and be ready to bring from place to place.
